This letter of guarantee is in accordance to CFR 21-Food and Drugs of US Food and Drug Administration.

The guarantee applies for Thermi-SP heat treatment process. This process consists in introducing nitrogen and carbon on the surface of austenitic stainless steels components and results in an increase in the surface hardness. This process is in accordance with the FDA rules and regulations.

We do not guarantee the component or take responsibilities for accordance to FDA rules and regulations. The guarantee expires if changes are made to the component, especially regarding the surface, after Thermi-SP processing. Furthermore, Thermi-Lyon do not take responsibility for the design, the production, the maintenance or all purpose of use of the component according to FDA rules and regulations.

This letter of guarantee is general and ongoing and applies for the Thermi-SP process only.
